

Botanischer Garten zu Hamburg

den 12^{ten} Februar 1857

My very dear friend,

It was for yourself (not for Prof. H.) I addressed the volume of our Acta, and I added the diploma sent me by Herr ab Speckhoff. Dr. Fischer is not yet arrived here, but I heard from his brother in law that his coming is expected. I am sorry to tell you there is no probability he shall become the successor of Link at Berlin. It was a very large parcel of dried plants from the collections of Dr. Presl. I sent for your herbarium directly to New-York Presl etc. etc. The small parcel with Hepaticae from the herbarium of Dr. Taylor shall be returned to Dr. Boott as soon as I have finished the examination. To Dr. Vahl I sent what you have designed for him, but I heard from Copenhagen that he is so very ill and there is no hope to see him restored. I beg you to have the goodness to offer my very best regards to my dear friends Sir W. Hooker and Dr. Wallich and to excuse these few lines, because my eyes are so very suffering that I can't write more. Believe me to be faithful

Yours

Lehmann
